Omnis Multi-Asset Income Fund, a sub-fund of Omnis Managed Investments ICVC

Share Class A Acc (ISIN GB00BYSQFH99)

The Fund is managed by Omnis Investments Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective:

- The Fund aims to achieve an income yield which, after all fees and expenses, is equal to or greater than 130% of that generated by a composite of the MSCI AC World Index (GBP) (60%) and the ICE BoAML Global Broad Market Hedged Index (GBP) (40%) while offering the potential for some capital growth over a five-year rolling period.

Policy:

- The investment policy of the Fund is to gain exposure through a flexible asset allocation to a broad diversified range of asset classes including, equities, fixed interest securities, currencies, cash, near cash and deposits, warrants and approved money market instruments as detailed in the Prospectus.
- At least 70% of the exposure to these asset classes is expected to be achieved through investment in a combination of transferable securities, collective investment schemes (including exchange traded funds and other schemes managed and operated by the ACD or its associates), deposits and derivatives. The Fund may also seek to gain exposure to the property or commodities markets through investment in eligible asset classes. The Fund will not have any restrictions on the proportion of the Fund allocated to any asset classes and may invest in any geographic or economic sectors of the world.
- Derivatives may be used for investment purposes as well as for efficient portfolio management.

Other information:

- The performance of the Fund will be measured against a composite benchmark for target return purposes based on the MSCI AC World TR Index (GBP) (60%) and the ICE BoAML Global Broad Market Hedged TR Index (GBP) (40%). The Fund will use this composite benchmark as an appropriate target because the Investment Manager utilises this index when measuring the Fund's income yield.
- The Fund has discretion to invest in a range of investments as described and is not constrained by a benchmark.
- Any income from your investments is added to the value of your shares.
- Investors' requests to buy, sell or switch shares will be carried out at midday on each working day (which excludes UK public holidays). A request received after midday will be dealt with on the next working day.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five to ten years and should be regarded as a long-term investment.
- Upon the sale of your shares, especially in the short-term, you may receive less than the original amount you invested.
- There can be no guarantee that the objective of the Fund will be achieved.

RISK AND REWARD PROFILE

Potentially lower reward ← Potentially higher reward
Lower risk ← Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- this indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- the risk category shown is not guaranteed to remain unchanged and may shift over time.
- the risk and reward indicator table demonstrates where a Fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest category does not mean 'risk free'.
- the Fund appears as a "5" on the scale. This is because the Fund invests in assets that typically carry medium risk and offer medium rewards compared with other categories of assets.

The indicator does not take account of the following risks of investing in the Fund:

Availability Risk: there may be less availability or demand for some investments which may make them more difficult to buy or sell.

Counterparty Risk: the insolvency of any institutions providing services such as safe-keeping of assets or acting as counterparty to derivatives or other instruments may expose the Fund to financial losses.

Currency Risk: the fund can be exposed to different currencies therefore changes in exchange rates may decrease the value of your investment.

Derivatives Risk: derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the size of losses and gains, causing the value of your investment to fluctuate.

Interest Payments Risk: there is a risk that the issuers of bonds may not be able to repay the money they have borrowed nor make any interest payments.

Investing in Bonds Risk: the value of bonds tend to decrease when interest rates and/or inflation rises.

Liquidity Risk: changes in market conditions may mean that it is not easy to buy or sell investments at a desired time and price.

Market Risk: the value of investments and the income derived from them may fall as well as rise and you may not get back the original amount invested. Over time, inflation may erode the value of investments.

Infectious viruses: these may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of your investment and any distributions paid.

For full details of the Fund's risks please see Section 5 of the Fund's prospectus.

CHARGES FOR THIS FUND

The charges you pay are used to pay the cost of running the Fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges that may be taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested (Entry Charge) and before the proceeds of your investment are paid out (Exit Charge).

Charges taken from the Fund over a year

Ongoing charge	0.94%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds) you might pay less – you can find out actual entry and exit charges from your financial adviser.

The ongoing charges figure is based on expenses for the twelve month period ending May 2021. Ongoing charges may vary from year to year. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

From 17 June 2021, the OCF reflects the synthetic OCF of the underlying CIS (including closed ended funds) in which it invests.

For more information about charges please see Section 7 of the Fund's prospectus.

PAST PERFORMANCE

Past performance is not a reliable indicator of future results.

The Fund was launched on 2 March 2015. Share class A Acc was launched on 1 October 2015.

Performance is calculated in British pounds after the ongoing charges and transaction fees have been deducted.
